ZTAG-TH

Single-Use Temperature&Humidity Data Logger

Technical Specifications

Battery life	Up to 2 years（1 year storage / 1 year useful life）@25°C，5 minutes logging interval
Operation Temperature	-30°C~70°C（0-100%RH）
Measurement Accuracy	±0.5°C（±3%RH@20-80%RH,±4%RH@other）
Resolution	0.1°C（0.1%RH）
Alarm Limit	Up to 4 individually programmable alarm limits（Alarm threshold and over-temperature trigger time can be customized according to customer needs）
Logging Interval	1 minute -24 hours optional（Default 5 minutes）
Memory Space	Up to 25,000 points@Single PDF/CSV report，18,000 Points @PDF&CSV report
Start Delay	0 minute -24 hours optional（Default 10 minutes）
Start Mode	Manual start
Report Format	PDF/CSV/PDF&CSV(Optional, configured before leaving the factory)
IP Grade	IP65
Battery Type	3.0V CR2450
Connection	USB2.0
Weight	30g
Dimensions	105*40*10mm
Certification	CE，EN12830:2018，RTCA/DO-160G，RoHS

Air Freight Compliance

Certified for air freight transport - safe for airborne shipment even while actively recording.

Thin and light design

Ultra-slim lightweight construction - saves space for bulk transportation and storage.

Complies with EN12830

Fully conforms to EN12830 standard - ensures standardized and reliable temperature monitoring.

Non-Drive Report

Plug-and-play report generation - no additional driver or software installation needed.

Simple and easy to use

User-friendly one-touch operation - ready to use out of the box with no complicated setup.
